

To Whom it May Concern:

Vasilii Bologov joined Luxury Air Travel as Chief Technical Officer from 2018 - 2020.

During this period of time he was responsible for all technical questions in the company: gathering IT team, managing projects, creating daily/weekly tasks for the team, reporting, making sure that all the projects are finished on time, he and his team built our CRM system from 0 in a really short period of time.

I am happy to act as a reference for Vasilii and can confirm he is one of the best workers I had, unfortunately due to covid-19 company will be closed. Responsible, always available to resolve any issues, has the ability to liaise between different departments, and very accurate.

Please feel free to email me in case you will need any further information at Info@luxairtravel.com

Sincerely,

Founder and CEO at Luxury Air Travel
Andrei Muntean
