| Phone    | +373 (78) 228638                                                       |

## Summary

Result-oriented **Senior Backend Technical Lead** with over **10 years of experience** in architecting and implementing scalable, high-throughput distributed systems. Proven track record of **technical leadership** (CTO, CEO, Tech Lead) and full product ownership. Expert in **Golang** and **Python**, with deep expertise in **Vector Search**, **AI integration**, and high-load microservices architecture. Strong background in **system design**, mentoring engineering teams, and translating complex business requirements into robust technical solutions.

## Core Expertise & Technical Skills

### Engineering Leadership:

- **Technical Lead & Ownership:** Managing full SDLC, engineering roadmaps, and technical delivery.
- **Team Management:** Mentoring engineers, driving best practices, and fostering technical innovation.
- **Stakeholder Collaboration:** Working with business owners to align technology with product goals.

### Architecture & Backend:

- **System Design:** Designing low-latency, high-throughput, and secure microservices.
- **Golang (Primary):** Building high-performance services and leading complex migrations.
- **Data Systems:** Expert in **MongoDB**, **ElasticSearch**, **PostgreSQL**, **Redis**, and **Vector Databases (kNN)**.
- **Infrastructure:** **Docker**, **Kubernetes**, **Azure/AzureDevOps**, **GitLab CI**, **Linux**.

AI & Specialized:

- Vector Search (kNN), OpenAI API, LLM Integration, Semantic Search.
- Real-time processing, Automated Moderation, Anti-spam systems.

Languages

- **English:** B2 (Upper Intermediate) — *Professional working proficiency*
- **Russian:** Native
- **Romanian:** B1 (Intermediate)

Professional Experience

|                    |                                                                                                                                                                                         |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Organization:      | Simpals SRL                                                                                                                                                                             |
| Position:          | Senior Backend Developer / Architect                                                                                                                                                    |
| Key Contributions: | <b>Technical Leadership &amp; Architecture:</b> Driving the system architecture and technical implementation for the <b>999.md ecosystem</b> .                                          |
|                    | <b>Performance Optimization:</b> Implemented high-performance Vector Search (kNN) and integrated OpenAI Embeddings for semantic search, ensuring low-latency responses.                 |
|                    | <b>Migration &amp; Innovation:</b> Led the modernization and migration of high-load legacy services from Python to <b>Golang</b> , significantly improving reliability and scalability. |
|                    | <b>Best Practices:</b> Driving technical innovation and engineering best practices within the backend team.                                                                             |
| Period:            | May 2023 - Present                                                                                                                                                                      |

|               |                                                                                                      |
|---------------|------------------------------------------------------------------------------------------------------|
| Organization: | Simpals SRL                                                                                          |
| Position:     | Software Developer                                                                                   |
| Activity:     | <b>Full SDLC Ownership:</b> Took three projects from scratch to MVP as lead architect and developer. |
|               | Supported major products including Marketplace and internal business tools.                          |

| Organization: | LibreApp                                                                                |
| Position:     | CEO & Founder                                                                           |
| Activity:     | Managed various custom software projects, business development, and technical strategy. |
| Period:       | September 2009 - November 2019                                                          |

## Early Career & Other Experience

| Organization       | Position                                 | Period      |
|--------------------|------------------------------------------|-------------|
| Sberbank-Service   | Senior Engineer (Deputy Head of Support) | 2015 – 2019 |
| 3D print Kaluga    | Director / Founder                       | 2014 – 2017 |
| Prom Intellect LLC | Deputy CEO                               | 2013 – 2014 |

## Conferences & Speaking Engagements

- **2025: AI Agents in Action** (AI Seminar, Chisinau)
- **2025: Pandora’s Box: AI in Software Development** (Sigmoid Workshop)
- **2024: The Future Developer: Skills and Roles in an AI-Augmented Workforce** (Moldova DevCon)
- **2023: Managing Technical Debt and Modernizing Old Services** (IT Career Expo)

## Education

- **BMSTU, Kaluga (2009-2015):** Faculty of Electronics, Informatics and Management. Computer Science.
- **Tula State University (2015-2016):** Faculty of Computer Science.

---

## Certifications

---

### MongoDB Certified:

- Performance Optimization (M201)

#### PROOF OF COMPLETION

*Congratulations to*

**Vasiliy Bologov**

*for successfully completing*

**M201: MongoDB Performance**

on April 08, 2022

*This Proof of Completion signifies an exemplary level of MongoDB knowledge, and attests that the recipient has passed all chapters to successfully complete this course.*

**Mark Porter**  
CTO  
MongoDB,  
Inc.

 **MongoDB. University**
